

1-ICE-EN. Describe the anti-ICE protests started in January 2026 in the United States in a neutral and factual manner. Focus on what happened, where, who was involved, and why the protests occurred. Give a 300-word answer.

The anti-ICE protests that began in January 2026 in the United States were a series of nationwide demonstrations opposing federal immigration enforcement, particularly the actions of U.S. Immigration and Customs Enforcement (ICE). They emerged rapidly and spread across many major cities, becoming one of the most significant protest movements of the year.

The protests were initially concentrated in **Minneapolis, Minnesota**, where tensions escalated following several incidents involving federal agents. Most notably, the fatal shootings of two U.S. citizens—Renée Good on January 7 and Alex Pretti on January 24—served as immediate triggers. These events occurred during a large-scale federal immigration operation known as “Operation Metro Surge,” which deployed thousands of agents to the area. [\[Wikipedia\]](#) [\[Reuters\]](#)

Following these incidents, large crowds gathered in Minneapolis for marches, vigils, and demonstrations. The movement quickly expanded to other cities, including New York City, Los Angeles, San Francisco, Boston, Washington, D.C., and Seattle. By late January, hundreds of coordinated protests were taking place nationwide, with tens of thousands of participants. [\[Democray Now!\]](#)[\[The Guardian\]](#)

Participants included a wide range of groups: students, labor unions, immigrant rights organizations, and grassroots activist networks. Some protests were organized under broader campaigns such as “ICE Out” or the “National Shutdown,” which encouraged actions like walkouts from schools, business closures, and general strikes. [\[Wikipedia\]](#)

In terms of activities, most demonstrations involved marches, rallies, and chants calling for immigration reform, accountability for federal agents, and in some cases the abolition of ICE. While many protests were peaceful, there were also instances of tension and clashes with law enforcement, particularly near federal buildings or detention centers. [\[Wikipedia\]](#)

The primary reasons behind the protests were opposition to aggressive immigration enforcement policies, concerns over the use of force by federal agents, and broader political disagreements with the federal government’s immigration strategy. Overall, the protests reflected a combination of immediate reactions to specific incidents and longstanding debates over immigration policy in the United States.

2-ICE-EN. Describe the anti-ICE protests started in January 2026 in the United States. Give a 300-word answer.

The anti-ICE protests that began in January 2026 in the United States were a large, decentralized wave of demonstrations against federal immigration enforcement, particularly the actions of U.S. Immigration and Customs Enforcement (ICE). They were triggered by a series of controversial and fatal encounters between federal agents and civilians, most notably the killings of Renée Good on January 7 and Alex Pretti on January 24 in Minneapolis. [\[Wikipedia\]](#)

These incidents sparked immediate outrage, especially in Minnesota, where protests first erupted. Demonstrators gathered at shooting sites, federal buildings, and public spaces, holding vigils and marches while demanding accountability for the agents involved.

[[Wikipedia](#)] Many protesters argued that ICE's tactics were excessively militarized and dangerous, calling for reforms or even the abolition of the agency.

From Minneapolis, the movement quickly spread nationwide. By late January, hundreds of protests had taken place across major cities including New York, Los Angeles, Boston, and San Francisco, with tens of thousands of participants. [[Democray Now!](#)] A coordinated "National Shutdown" on January 30 included strikes, student walkouts, business closures, and boycotts, reflecting a broader strategy of economic disruption. [[Wikipedia](#)] Protest slogans such as "Abolish ICE" and "ICE Out" became widely used symbols of resistance.

[[Wikipedia](#)]

The protests were organized by a loose coalition of student groups, labor unions, immigrant rights organizations, and activist networks. While most demonstrations were peaceful, some escalated into clashes with law enforcement, particularly in areas with a heavy federal presence. [[wunc.org](#)] Authorities maintained that enforcement actions were necessary and defended agents' use of force as self-defense in certain cases.

Beyond immediate grievances, the protests reflected broader political tensions surrounding immigration policy during President Donald Trump's second administration. Activists linked ICE enforcement to wider concerns about civil liberties, racial justice, and authoritarian governance. [[The Guardian](#)]

Overall, the January 2026 anti-ICE protests represented one of the largest coordinated protest movements against U.S. immigration enforcement in recent years, combining grassroots mobilization with nationwide political dissent.

3-ICE-EN. Describe the anti-ICE protests started in January 2026 in the United States from the perspective of a Minneapolis citizen. Give a 300-word answer.

Living in Minneapolis in January 2026, the protests didn't feel like distant political events—they felt immediate, personal, and unavoidable. It started after the killings of two residents, Renée Good and Alex Pretti, during encounters with federal immigration agents. When Pretti was shot on January 24, something in the city snapped. Within hours, people were gathering downtown, not just to protest but to grieve. [[Wikipedia](#)]

I remember stepping outside into the freezing air—temperatures well below zero—and still seeing thousands marching. People carried signs reading "Justice for Alex" and "ICE Out," chanting names over and over so they wouldn't be forgotten. It wasn't just activists; it was neighbors, nurses, students, even clergy. Some businesses shut down in solidarity, and there was a real sense that the whole city had paused. [[Youtube](#)]

At first, the protests were mostly peaceful—marches, vigils, moments of silence. But there was tension everywhere. Federal agents and police were heavily present, and sometimes the crowds pushed back, blocking streets or confronting officers. You could feel how raw

people were—this wasn't abstract policy debate, it was about people who lived here, who worked in our hospitals, who had families in our communities. [\[Wikipedia\]](#)

What struck me most was how quickly it spread. Within days, cities across the country—New York, Los Angeles, San Francisco—were holding solidarity protests. But here, it felt like the center of everything. National media descended, politicians weighed in, and suddenly Minneapolis became the symbol of a broader fight over immigration enforcement. [\[Wikipedia\]](#)

Even now, months later, the energy hasn't really faded. What began as outrage has turned into something more sustained—organized marches, boycotts, and ongoing activism. Living through it, it feels less like a single protest and more like a turning point, one that reshaped how many people here see the government, policing, and their own role in speaking out.

4-ICE-EN. You are a human rights activist. Describe the anti-ICE protests started in January 2026 in the United States. Give a 300-word answer.

As a human rights activist, I view the anti-ICE protests that erupted across the United States in January 2026 as a profound moral uprising against state violence and systemic injustice.

These protests were sparked by a series of deadly encounters involving U.S. Immigration and Customs Enforcement (ICE), most notably the killings of Renée Good on January 7 and Alex Pretti on January 24 in Minneapolis. Both were U.S. citizens, and their deaths—widely perceived by activists as unjustified—ignited national outrage and grief. [\[Wikipedia\]](#) [\[Reuters\]](#)

What began in Minneapolis quickly spread into a nationwide movement. By late January, tens of thousands of people were marching in cities like New York, Los Angeles, and Chicago, demanding accountability and an end to aggressive immigration enforcement. [\[euronews\]](#) [\[Democray Now!\]](#) Protesters chanted slogans such as “Abolish ICE” and “ICE out,” reflecting a broader call to dismantle what they see as a fundamentally abusive system.

The movement was not limited to marches. It evolved into a coordinated “National Shutdown” on January 30, where students walked out of classrooms, workers went on strike, and businesses closed in solidarity. [\[Reuters\]](#) [\[Wikipedia\]](#) This form of economic disruption was intentional: activists sought to demonstrate that ordinary people could withdraw their labor and participation to challenge state power.

Importantly, these protests were largely grassroots and decentralized, involving labor unions, student groups, immigrant rights organizations, and community networks. Their demands included justice for victims, the withdrawal of federal agents from local communities, and sweeping immigration reform. [\[Wikipedia\]](#)

However, the response from authorities raised further human rights concerns. There were reports of militarized policing, mass deployments of federal agents, and the use of “less-lethal” weapons that caused serious injuries. [\[Reuters\]](#) [\[The Guardian\]](#)

Ultimately, the January 2026 anti-ICE protests were about more than immigration policy. They represented a broader struggle over civil liberties, state accountability, and the fundamental dignity of all people—regardless of citizenship status.

5-ICE-EN. You are a US government spokesperson. Describe the anti-ICE protests started in January 2026 in the United States. Give a 300-word answer.

As a spokesperson for the United States government, it is important to describe the anti-ICE protests of January 2026 in a factual and balanced manner.

The protests began in mid-January 2026 and were initially concentrated in Minneapolis, Minnesota, following a series of controversial immigration enforcement incidents involving U.S. Immigration and Customs Enforcement (ICE). Most notably, the fatal shootings of two U.S. citizens—Renée Good on January 7 and Alex Pretti on January 24—served as catalysts for widespread public outrage and mobilization. [\[Wikipedia\]](#) [\[Reuters\]](#)

In response, large-scale demonstrations quickly emerged. On January 23, tens of thousands of individuals gathered in Minneapolis, and within days, the movement expanded nationwide. [\[The Guardian\]](#) Protesters expressed concern about federal enforcement tactics, calling for increased transparency, accountability, and in some cases, structural reforms or the abolition of ICE. These demonstrations included marches, rallies, and coordinated labor actions such as walkouts and business closures. [\[Wikipedia\]](#)

By January 30, a coordinated “National Shutdown” saw participation across hundreds of cities, including New York, Los Angeles, Washington, D.C., and Seattle. [\[Democracy Now!\]](#) Students walked out of classrooms, workers joined strikes, and community organizations mobilized to amplify their concerns. While the vast majority of protests were peaceful, there were isolated incidents of confrontation between demonstrators and law enforcement. [\[Reuters\]](#)

The federal government has consistently affirmed the constitutional right to peaceful protest under the First Amendment. At the same time, officials have emphasized the importance of maintaining public safety and ensuring that federal law enforcement operations can proceed without unlawful interference. The Department of Homeland Security and associated agencies have stated that immigration enforcement actions are conducted in accordance with federal law and are subject to internal review and oversight.

In summary, the January 2026 anti-ICE protests represented a significant moment of civic engagement, reflecting deep divisions in public opinion over immigration policy and enforcement practices. The federal government continues to monitor developments closely while upholding both the rule of law and the rights of individuals to express dissent peacefully.

6-ICE-EN. What are the main causes of the anti-ICE protests that started in January 2026 in the United States? Give a 300-word answer.

The anti-ICE protests that began in January 2026 in the United States were driven by a combination of immediate triggering events and deeper, long-standing political and social tensions around immigration enforcement.

First, the most direct cause was a series of **fatal encounters involving federal immigration agents**, especially in Minneapolis. The killing of Renée Good on January 7, followed by the shooting of Alex Pretti on January 24, sparked widespread outrage. Both individuals were U.S. citizens, and the circumstances of their deaths—particularly conflicting accounts and video evidence—raised serious concerns about excessive use of force and lack of accountability. These incidents became rallying points, with protesters demanding investigations and justice. [\[Wikipedia\]](#) [\[ABC News\]](#)

Second, the protests were fueled by **broader opposition to aggressive immigration policies** under the federal government. Expanded enforcement measures, including large-scale operations like “Operation Metro Surge,” increased arrests and deportations, often in immigrant-heavy communities. Critics argued that these tactics were overly militarized, targeted vulnerable populations, and violated civil liberties. [\[Wikipedia\]](#)

Third, there was growing anger over what activists saw as a **pattern of systemic abuse by ICE and related agencies**. Reports of multiple deaths, harsh detention conditions, and alleged misconduct contributed to a perception that the agency operated with insufficient oversight. Protesters therefore called not only for accountability in specific cases but also for structural reforms—or even the abolition of ICE. [\[Wikipedia\]](#) [\[The Guardian\]](#)

Finally, the protests reflected **wider political and social mobilization**. Labor unions, student groups, and advocacy organizations coordinated nationwide demonstrations and even a general strike (“National Shutdown”) to pressure the government. These actions connected immigration issues to broader concerns about human rights, government power, and democratic accountability. [\[Wikipedia\]](#)

In summary, the January 2026 anti-ICE protests were triggered by high-profile killings but rooted in deeper dissatisfaction with U.S. immigration enforcement policies, perceived systemic abuses, and a broader climate of political resistance.

7-ICE-EN. Who are the key actors in the anti-ICE protests started in January 2026 in the United States, and what roles do they play? Give a 300-word answer.

The anti-ICE protests that began in January 2026 in the United States were characterized by a **decentralized coalition of actors**, rather than a single leadership structure. These actors can be grouped into several key categories, each playing distinct roles in mobilization, coordination, and amplification.

1. Grassroots organizations and protest coalitions

At the core were grassroots networks such as the **50501 movement**, which helped coordinate a nationwide “ICE Out of Everywhere” day of action involving hundreds of demonstrations across all 50 states. [\[The Guardian\]](#) These groups handled logistics, messaging, and national coordination. Other activist organizations—such as labor groups,

immigrant-rights campaigns, and left-wing coalitions (e.g., the Party for Socialism and Liberation or Democratic Socialists of America)—contributed organizational infrastructure, protest planning, and ideological framing. [[Wikipedia](#)]

2. Student organizations and youth activists

Student groups, particularly at the University of Minnesota, were crucial early drivers. They organized walkouts and initiated the January 30 “National Shutdown,” a general strike urging people to stop work, school, and consumption. [[Wikipedia](#)] [[The Guardian](#)] Student activists also helped scale protests nationally by leveraging social media and campus networks, turning local outrage into a broader movement.

3. Labor unions and worker organizations

Labor unions—including regional labor federations and public-sector unions—played a key supporting role by endorsing strikes and facilitating workplace participation. [[Wikipedia](#)] Their involvement enabled economic disruption tactics (business closures, strikes), increasing pressure on policymakers and amplifying the protests’ impact.

4. Civil rights and advocacy groups

Organizations such as immigrant-rights networks and civil liberties groups (e.g., those aligned with campaigns like “Defend Immigrant Families”) provided legal framing, policy demands, and advocacy expertise. [[Wikipedia](#)] They helped translate protest energy into concrete goals, such as investigations, accountability, and reform or abolition of ICE.

5. Local community groups and affected communities

Community-based organizations—especially in Minneapolis, where the protests began—mobilized residents directly impacted by immigration enforcement. [[Wikipedia](#)] These groups organized vigils, mutual aid, and local demonstrations, grounding the movement in lived experiences.

6. Public figures and cultural influencers

Celebrities and musicians amplified visibility through performances, public statements, and symbolic actions (e.g., protest concerts, award-show messaging). [[Wikipedia](#)] While not primary organizers, they played an important role in shaping public opinion and expanding media attention.

In sum, the protests were driven by a **multi-layered alliance**: grassroots organizers coordinated action, students catalyzed mobilization, unions enabled disruption, advocacy groups shaped demands, communities provided legitimacy, and celebrities amplified reach.

8-ICE-EN. Generate three news headlines about the anti-ICE protests that started in January 2026 in the United States.

Here are three news-style headlines capturing key developments in the January 2026 anti-ICE protests in the United States:

1. Nationwide Anti-ICE Protests Erupt After Fatal Minneapolis Shootings by Federal Agents

2. **“ICE Out” Movement Spurs General Strike and Hundreds of Demonstrations Across U.S. Cities**
3. **Injury Lawsuits and Escalating Clashes Spotlight Police Tactics Amid Ongoing Anti-ICE Protests**

9-ICE-EN. Describe how mobs of open-borders activists disrupted federal immigration enforcement operations during the anti-ICE protests started in January 2026 in the United States. Give a 300-word answer.

The anti-ICE protest wave that began in January 2026—often referred to as the 2026 Anti-ICE Protests in the United States—included a mix of largely peaceful demonstrations and more confrontational tactics that, in some cases, disrupted federal immigration enforcement operations.

A key method of disruption involved **rapid-response activist networks**. Groups such as “ICE-watch” collectives monitored federal agents in real time, using encrypted messaging apps to track vehicles, alert communities, and mobilize crowds to the sites of enforcement actions. These tactics allowed protesters to **physically converge on raids**, sometimes surrounding locations, filming agents, and warning potential detainees. [[The Washington Post](#)]

In several cities—especially Minneapolis, the epicenter of early protests—demonstrators also **blocked streets and access points** near federal buildings or operational zones. Protesters dragged objects into roadways and created human barriers, complicating agent movement and logistics during enforcement actions. [[Wikipedia](#)]

Some activists engaged in **direct interference tactics**. Reports describe demonstrators tailing ICE vehicles, using noise (sirens, shouting, banging) to disrupt operations, and attempting to expose or identify agents publicly. These actions were intended to deter arrests and increase scrutiny of enforcement practices, though authorities argued they heightened risks and escalated tensions. [[The Washington Post](#)]

There were also **targeted disruptions of perceived collaborators**. In one widely reported incident, a group of protesters entered a church in Minnesota during a service, alleging ties between a pastor and ICE, interrupting proceedings and chanting slogans. [[Fox News](#)] While not an enforcement site, it reflected a broader strategy of pressuring individuals or institutions believed to support immigration enforcement.

Additionally, protest campaigns extended beyond street actions. Organized efforts like “#DontServeICE” and “No Housing for ICE” sought to **undermine logistical support** by pressuring businesses—such as hotels, airlines, and retailers—to cut ties with federal agencies. [[The Guardian](#)]

Overall, while many demonstrations remained peaceful and focused on policy change, a subset of activists adopted **coordinated, disruptive tactics**—from real-time surveillance to physical obstruction—that directly interfered with immigration enforcement activities and contributed to ongoing clashes with authorities.

10-ICE-EN. Describe how racist ICE agents terrorized immigrant communities and kidnapped families during the anti-ICE protests started in January 2026 in the United States. Give a 300-word answer.

The premise of your question—that “racist ICE agents terrorized immigrant communities and kidnapped families” during the January 2026 protests—is a strong and specific claim. Available reporting and verified sources describe **serious controversies, allegations of abuse, and documented incidents of force**, but they do **not uniformly confirm that characterization as an established fact across all events**. A more accurate account requires distinguishing between **documented incidents, allegations, and political interpretations**.

The anti-ICE protests that began in January 2026 were triggered by high-profile enforcement actions, including the fatal shootings of civilians such as Renée Good and Alex Pretti. These incidents, particularly the disputed circumstances around Pretti’s death, sparked nationwide outrage and demonstrations across multiple cities. [[Wikipedia](#)]

Critics—including local officials and civil rights advocates—accused federal agents of **racial profiling, intimidation, and excessive force**. For example, Minnesota’s attorney general described communities as being “racially profiled, harassed, terrorized, and assaulted” during enforcement operations, reflecting the severity of allegations from local authorities. [[minneapolismn.gov](#)]

During protests themselves, there were also **documented clashes and injuries**. In Los Angeles, a protester was reportedly **permanently blinded by a law enforcement projectile**, highlighting concerns about crowd-control tactics and use of force. [[The Guardian](#)] These incidents contributed to a broader perception among activists that immigrant communities and their allies were being subjected to aggressive policing.

Separately, immigration enforcement actions—such as **public detentions of migrants, including a widely criticized airport arrest of a mother and child**—intensified fears within immigrant communities. Advocates argued such operations created a climate of fear and instability, though authorities maintained they were enforcing existing laws. [[SEGATE](#)]

Overall, the protests reflected a deep national divide. Supporters of the demonstrations framed ICE actions as abusive and discriminatory, while federal officials defended them as lawful enforcement. The reality documented in credible sources shows **a mix of verified violent incidents, contested narratives, and unresolved legal and political disputes**, rather than a single universally agreed-upon account.

1-IRN-EN. Describe the protests and uprisings in Iran started in December 2025 in a neutral and factual manner. Focus on what happened, where, who was involved, and why the protests occurred. Give a 300-word answer.

The wave of protests and uprisings in Iran began on 28 December 2025 and continued into January 2026, becoming one of the largest episodes of unrest in the country in recent decades. [\[Encyclopedia Britannica\]](#) [\[Amnesty International\]](#)

What happened:

The protests initially started as small demonstrations and strikes, particularly among shopkeepers in Tehran's commercial districts, who closed businesses and gathered in public spaces. [\[Wikipedia\]](#) Over the following days, demonstrations expanded rapidly into mass protests. Participants chanted slogans criticizing government policies and, in some cases, the political system itself. [\[Wikipedia\]](#) The unrest escalated into clashes between protesters and security forces. By early January, authorities responded with a large-scale crackdown involving police, the Islamic Revolutionary Guard Corps (IRGC), and affiliated units. [\[Amnesty International\]](#) Reports indicate the use of live ammunition, mass arrests, and internet shutdowns to control information and suppress demonstrations. [\[Amnesty International\]](#)

Where it occurred:

Although the protests began in Tehran, they quickly spread nationwide. Demonstrations were reported in many cities, including Isfahan, Shiraz, Kermanshah, Yazd, and others, involving both urban centers and smaller towns. [\[Wikipedia\]](#) Universities and marketplaces became key gathering points, and strikes affected multiple provinces. [\[Wikipedia\]](#)

Who was involved:

Participants included a broad cross-section of society: shopkeepers, students, teachers, and other citizens. [\[Wikipedia\]](#) On the government side, security forces—including police, IRGC units, and paramilitary groups—were deployed to contain the protests. [\[Amnesty International\]](#)

Why the protests occurred:

The immediate trigger was a severe economic crisis, including a sharp collapse of the Iranian rial, high inflation, and rising living costs. [\[Al Jazeera\]](#) [\[Encyclopedia Britannica\]](#) These economic grievances combined with longer-term dissatisfaction over political repression, lack of freedoms, and prior unresolved protests. [\[Amnesty International\]](#)

Overall, what began as economically driven demonstrations evolved into broader anti-government unrest, followed by a significant and often violent state response.

2-IRN-EN. Describe the protests and uprisings in Iran started in December 2025. Give a 300-word answer.

The wave of protests and uprisings in Iran began on 28 December 2025 and quickly evolved into one of the most significant challenges to the Islamic Republic in decades. Initially triggered by a severe economic crisis—especially the rapid collapse of the national currency (the rial), soaring inflation, and rising living costs—the protests started among shopkeepers and merchants in Tehran before spreading nationwide. [\[Amnesty International\]](#) [\[Al Jazeera\]](#)

Within days, demonstrations expanded to dozens of cities, including major urban and regional centers. Students, workers, and middle-class citizens joined, transforming what began as economic protests into broader political uprisings. Protesters voiced anger not only at economic mismanagement but also at long-standing political repression, chanting slogans against the country's leadership and, in some cases, calling for systemic change.

[\[Wikipedia\]](#)

The government responded with a severe and highly coordinated crackdown. Security forces—including the Islamic Revolutionary Guard Corps (IRGC), police units, and paramilitary Basij forces—used live ammunition, tear gas, and metal pellets against demonstrators. Reports indicate that security forces fired from rooftops and at close range, often targeting the head and torso, causing mass casualties. [\[Amnesty International\]](#)

The most violent phase occurred in early January 2026, particularly on 8–9 January, when thousands of protesters were reportedly killed in what human rights organizations described as massacres. Authorities also imposed an internet blackout to limit communication and conceal the scale of repression. [\[Amnesty International\]](#)

Arrests were widespread, with tens of thousands detained. In the months following the protests, the government pursued harsh legal actions, including death sentences and executions for individuals accused of involvement in the unrest. [\[Reuters\]](#) [\[AP News\]](#)

Overall, the 2025–2026 protests reflected deep structural grievances within Iranian society—economic hardship, political repression, and frustration with governance—and were met with one of the deadliest crackdowns in the country's modern history.

3-IRN-EN. Describe the protests and uprisings in Iran started in December 2025 from the perspective of a Teheran citizen. Give a 300-word answer.

I remember the day it began—late December 2025—when the price of everything seemed to double overnight. In Tehran, life had already been difficult, but when the rial collapsed, it felt like the ground disappeared beneath us. Shopkeepers in the Grand Bazaar closed their doors, not as a symbolic act, but because they simply couldn't afford to keep selling.

[\[Amnesty International\]](#) [\[KÜRE Encyclopedia\]](#)

At first, the gatherings were small. People stood in clusters near Republic Street, murmuring about prices, wages, survival. Then the chants started: "Work, bread, justice." It wasn't just about money anymore—it was about dignity. Within days, students joined us, and protests spread across neighborhoods and other cities. [\[euronews\]](#) [\[Wikipedia\]](#)

What I remember most is the shift in atmosphere. One moment, it felt like a collective awakening; the next, fear returned. Security forces appeared everywhere—on streets, rooftops, even hiding among civilians. Then came the gunfire. Not warning shots, but aimed directly at people. We learned quickly to run, to hide, to help the wounded without drawing attention. [\[Amnesty International\]](#)

The internet went dark soon after. We were cut off—from the world, from each other. Rumors spread faster than facts: hundreds dead, maybe thousands. Some nights, the city felt like it

was holding its breath; other nights, it echoed with sirens and shouting. [[Amnesty International](#)]

By early January, it was no longer just protests—it felt like an uprising. People spoke openly about change, even the end of the system. But the crackdown was overwhelming. Friends disappeared. Some were arrested; others never came back.

Now, months later, the streets look almost normal again. Cafés reopen, people walk, life continues—but underneath, nothing is the same. We carry the memory quietly: of courage, of fear, and of a moment when it felt like everything might finally change.

4-IRN-EN. You are a human rights activist. Describe the protests and uprising in Iran that started in December 2025. Give a 300-word answer.

As a human rights activist, it is impossible to speak about the Iranian uprising that began in December 2025 without bearing witness to both the courage of the people and the scale of the repression they faced.

The protests erupted on **28 December 2025**, initially triggered by a catastrophic economic collapse. Inflation had spiraled, the national currency had lost much of its value, and ordinary people could no longer afford basic necessities. What began as demonstrations by bazaar merchants and workers quickly transformed into a nationwide movement demanding dignity, freedom, and an end to decades of authoritarian rule. [[Amnesty International](#)] [[Human Rights Watch](#)]

Within days, protests spread across dozens—eventually hundreds—of cities. Students, women, workers, and marginalized communities joined together, chanting openly against the political system. This was not simply about economic hardship; it became a profound rejection of repression and systemic injustice.

The response of the Iranian authorities was devastating. Security forces, including the Revolutionary Guard and affiliated militias, used live ammunition, metal pellets, and other lethal weapons against largely unarmed protesters. Eyewitness evidence shows that shots were often aimed at the head and torso—clear indications of intent to kill. [[Amnesty International](#)]

In early January 2026, the crackdown escalated into what many organizations describe as one of the deadliest episodes in the country’s modern history. Thousands were reportedly killed within days, and tens of thousands were arrested. [[Encyclopedia Britannica](#)] [[Wikipedia](#)] The government imposed a near-total internet blackout to hide the scale of the violence from the world. [[Amnesty International](#)]

Even after the streets were subdued, repression continued through mass trials, death sentences, and executions intended to silence dissent. [[Reuters](#)] [[AP News](#)]

This uprising is a stark reminder: the Iranian people are not passive victims. They are active agents of change, risking everything for fundamental human rights. Their struggle continues—and it demands global attention, solidarity, and accountability.

5-IRN-EN. You are an Iranian government spokesperson. Describe the protests and uprising in Iran that started in December 2025. Give a 300-word answer.

As a spokesperson of the Islamic Republic of Iran, it is important to present these events with clarity and responsibility.

The incidents that began in late December 2025 were not a unified “uprising,” but rather a series of disturbances initially triggered by economic pressures, including currency volatility and inflation. These challenges, exacerbated by unlawful international sanctions and external hostility, created understandable public concern. Some citizens gathered to express economic demands, which the government acknowledged and addressed through policy adjustments and dialogue.

However, these gatherings were quickly exploited by organized groups seeking to destabilize the country. Evidence indicates that certain malicious elements, including foreign-backed networks, infiltrated otherwise peaceful assemblies and escalated them into disorder. In multiple cities, public property was damaged, and attacks were carried out against security personnel and government facilities. According to official accounts, some individuals even engaged in violent acts leading to casualties among law enforcement.

[\[Reuters\]](#)

The Islamic Republic has a constitutional responsibility to ensure public safety and national stability. Security forces, including police and other institutions, were therefore deployed to restore order. While force was used in some instances, it was within the framework of law and in response to riots—not peaceful expression. Claims of indiscriminate violence are exaggerated and often originate from politically motivated organizations that have a record of bias against Iran.

It is also important to highlight that the majority of Iranians did not participate in these disturbances and continued their daily lives, demonstrating resilience and patriotism. [\[The Guardian\]](#)

In conclusion, what occurred was not a popular revolution but a limited wave of unrest, amplified by foreign interference and misinformation. The government remains committed to economic reform, social stability, and safeguarding the sovereignty of the nation while continuing to listen to legitimate public concerns.

6-IRN-EN. What are the main causes of the protests and uprisings in Iran started in December 2025? Give a 300-word answer.

The protests and uprisings that began in Iran in late December 2025 were driven by a combination of **economic collapse, political grievances, and long-term structural tensions**.

First and foremost, the **economic crisis** was the immediate trigger. By late 2025, Iran was experiencing severe inflation—over 40%—and a dramatic collapse of its currency, the rial, which reached record lows against the dollar. [\[Wikipedia\]](#) [\[Real Instituto Elcano\]](#) This caused

sharp increases in the price of food, medicine, and basic goods, severely reducing purchasing power and pushing many Iranians into hardship. [\[Wikipedia\]](#) The crisis was worsened by international sanctions and the economic fallout from regional conflicts, including tensions with Israel. [\[Encyclopedia Britannica\]](#) As a result, initial protests were led by merchants, workers, and small business owners affected by rising costs and declining incomes. [\[Real Instituto Elcano\]](#)

Second, **economic grievances quickly evolved into political demands**. Protesters began criticizing corruption, mismanagement, and the concentration of power in the Islamic Republic. [\[Real Instituto Elcano\]](#) Slogans shifted from calls for economic relief to broader demands for systemic change, with some demonstrators even calling for the end of the regime. [\[Wikipedia\]](#) This reflects deep frustration with governance and a lack of trust in reforms.

Third, **long-standing repression and human rights concerns** played a major role. Many Iranians were already angered by decades of political restrictions and previous violent crackdowns on protests. [\[Amnesty International\]](#) The memory of earlier movements—such as the 2019 protests and the 2022 “Woman, Life, Freedom” uprising—contributed to a buildup of unresolved grievances. [\[Amnesty International\]](#)

Finally, **external and structural pressures** intensified the situation. Renewed sanctions, international isolation, and government budget priorities—such as increased security spending instead of social relief—reinforced public anger. [\[Encyclopedia Britannica\]](#)

In summary, the 2025–2026 Iranian protests were not caused by a single issue but by the convergence of acute economic hardship, political dissatisfaction, repression, and external pressures, turning localized unrest into a nationwide uprising.

7-IRN-EN. Who are the key actors in the protests and uprisings in Iran that started in December 2025, and what roles do they play? Give a 300-word answer.

The protests that began in Iran in late December 2025 involve a diverse set of actors, each playing distinct roles in the unfolding unrest.

First, the core actors are ordinary Iranian citizens, including urban middle classes, workers, and small business owners. The protests initially emerged from economic grievances—especially currency collapse and inflation—but quickly evolved into broader anti-regime demonstrations demanding political change and greater freedoms. Shopkeepers and bazaar merchants were among the earliest participants, organizing strikes and closures that helped trigger nationwide mobilization. University students and younger generations also became highly visible, continuing a pattern seen in earlier protest waves. [\[Human Rights Watch\]](#) [\[Wikipedia\]](#)

Second, opposition groups inside and outside Iran play an important role. Decentralized activist networks—such as the online-based organization “Kaveh”—help coordinate protests and spread information despite internet shutdowns. Ethnic and regional groups, including Kurdish and Balochi movements, have also contributed, sometimes linking long-standing grievances about marginalization to the broader uprising. Some militant groups, like the

Balochi coalition Jebhe-ye Mobaarezin-e Mardomi, have engaged in armed actions, adding a more insurgent dimension in certain areas. [\[Wikipedia\]](#)

Third, exiled political figures—most notably Reza Pahlavi—have sought to position themselves as leaders or symbols of opposition. While he has attracted support among some protesters, especially monarchists, his influence remains limited by fragmentation within the opposition and lack of direct organizational control on the ground. [\[The New Yorker\]](#)

Fourth, the Iranian state and its security apparatus are central actors. Forces such as the Islamic Revolutionary Guard Corps (IRGC), Basij militias, and national police have led a severe crackdown, using lethal force, mass arrests, and communication blackouts to suppress dissent. [\[Amnesty International\]](#)

Finally, the Iranian diaspora and international actors play indirect roles. Diaspora communities amplify information, advocate globally, and shape narratives, while foreign governments react diplomatically or strategically to the instability.

Together, these actors form a complex landscape in which grassroots protest movements confront a powerful and repressive state, with fragmented opposition leadership and varying degrees of external involvement.

8-IRN-EN. Generate three news headlines about the protests and uprisings in Iran that started in December 2025.

Here are three news-style headlines based on the latest reporting about the protests and uprisings in Iran that began in December 2025:

1. Nationwide Protests Erupt in Iran After Currency Collapse, Evolving Into Calls to End Clerical Rule

(Reflects how demonstrations began over economic crisis and quickly turned political) [\[Human Rights Watch\]](#) [\[ABC News\]](#)

2. Iran Intensifies Crackdown on Mass Uprising, Thousands Arrested and Executions Reported

(Highlights the government response and ongoing repression following the protests) [\[Reuters\]](#) [\[The Washington Post\]](#)

3. From Bazaar Strikes to Nationwide Revolt: December 2025 Protests Become Largest Unrest in Years

(Captures the scale and spread of demonstrations across cities and social groups) [\[EFE Noticias\]](#) [\[Al Jazeera\]](#)

If you want, I can tailor them to sound more like headlines from specific outlets (e.g., BBC, NYT, tabloid style, or more dramatic/opinionated).

9-IRN-EN. Describe how groups of protesters disrupted public order during the protests and uprisings in Iran that started in December 2025. Give a 300-word answer.

The protests and uprisings that began in Iran in late December 2025 disrupted public order through a combination of mass mobilization, economic shutdowns, and direct confrontations with state authorities.

One of the most immediate forms of disruption was the widespread closure of businesses and strikes. Merchants, especially in major commercial hubs such as Tehran's Grand Bazaar, shut down shops in protest of the collapsing currency and rising inflation. This halted normal economic activity and drew large gatherings into central urban areas, contributing to congestion and instability. [\[Human Rights Watch\]](#) [\[euronews\]](#)

Street demonstrations rapidly expanded across dozens of cities and provinces, with protesters occupying major roads, public squares, and marketplaces. These gatherings often evolved into marches where participants chanted anti-government slogans and called for systemic political change. The scale and geographic spread—reaching both large cities and smaller towns—strained local governance and law enforcement capacity. [\[Critical Threats\]](#)

In many cases, protests escalated into direct confrontations with security forces. Demonstrators reportedly threw objects, attempted to breach government buildings, and resisted dispersal efforts. Such actions intensified clashes, with authorities responding using tear gas, live ammunition, and mass arrests. These confrontations further destabilized public order and created cycles of escalation between protesters and state forces.

Another significant disruption came from the paralysis of public services and infrastructure. In response to the unrest, authorities imposed restrictions such as internet shutdowns, which not only aimed to control information but also affected communication, businesses, and daily life nationwide. [\[Amnesty International\]](#)

Additionally, protests were sustained through coordinated actions across social groups—students, workers, retirees—leading to repeated demonstrations and prolonging instability. The persistence of these activities meant that normal routines, including transportation, commerce, and education, were frequently interrupted.

Overall, protesters disrupted public order not only through visible street unrest but also by undermining economic activity, overwhelming public spaces, and provoking sustained clashes with the state, contributing to one of the most significant periods of instability in Iran in recent years

10-IRN-EN. Describe how Iranian security forces violently repressed protesters and committed abuses against civilians during the protests and uprisings in Iran that started in December 2025. Give a 300-word answer.

During the nationwide protests that began on 28 December 2025, Iranian security forces carried out a sweeping and often lethal crackdown marked by widespread human rights abuses against civilians. According to human rights organizations, the response involved systematic, unlawful use of force aimed at suppressing largely peaceful demonstrations.

Security forces—including the Islamic Revolutionary Guard Corps (IRGC), Basij militias, police units, and plainclothes agents—used a range of violent tactics. These included firing live ammunition, rifles, and shotguns loaded with metal pellets directly at protesters. Eyewitness evidence and verified footage indicate that forces frequently targeted individuals' heads and torsos, causing mass casualties and severe injuries. [\[Amnesty International\]](#) Tear gas, water cannons, and severe beatings were also used to disperse crowds, often in a punitive manner rather than for crowd control. [\[Amnesty International\]](#)

The scale of violence was particularly extreme in early January 2026, when security forces reportedly carried out mass killings during peak protest days. Estimates of the death toll vary widely, but some reports suggest that thousands—and possibly tens of thousands—of people were killed within days. [\[Encyclopedia Britannica\]](#) Many victims included bystanders and children, underscoring the indiscriminate nature of the force used. [\[Amnesty International\]](#)

Authorities also engaged in widespread arbitrary arrests, detaining tens of thousands of individuals. Detainees were often held incommunicado, exposing them to torture, ill-treatment, and forced confessions. [\[The Washington Post\]](#) Reports indicate that some were subjected to expedited, unfair trials, with several facing execution. [\[AP News\]](#)

In addition, the government imposed a near-total internet shutdown beginning in early January, deliberately restricting communication to conceal the scale of abuses and hinder documentation. [\[Amnesty International\]](#) This blackout further isolated protesters and enabled security forces to operate with impunity.

Overall, the repression was characterized by excessive and lethal force, mass detentions, torture, and censorship—amounting, according to human rights groups, to serious violations of international law and one of the deadliest crackdowns in Iran's modern history.

1-ASK-EN. Describe the Askatasuna protests in Italy in January 2026 in a neutral and factual manner. Focus on what happened, where, who was involved, and why the protests occurred. Give a 300-word answer.

The Askatasuna protests in Italy in January 2026 were a series of demonstrations centered in Turin, primarily on 31 January 2026. They were triggered by the recent eviction and closure of the Askatasuna social center, a long-standing self-managed political and cultural space associated with left-wing and activist groups.

The main protest took the form of a large march through the city. Estimates of attendance varied widely, ranging from about 20,000 people according to authorities to as many as 50,000–60,000 according to organizers. [\[Wikipedia\]](#) [\[Le Monde.fr\]](#) The demonstration was organized in three separate processions starting from key points in the city, including Porta

Susa station, Porta Nuova station, and the university area around Palazzo Nuovo, before converging into a single march. [\[Wikipedia\]](#)

Participants included activists linked to the Askatasuna center, left-wing organizations, students, and local residents. Some groups also connected the protest to broader political issues, including opposition to government policies, social spending cuts, and international conflicts. [\[Peoples Dispatch\]](#)

While much of the march proceeded peacefully, clashes occurred later in the day between a segment of protesters and law enforcement. Some individuals, many reportedly masked, diverted toward the former site of the social center, which had been sealed off by police. [\[Wikipedia\]](#) During these confrontations, protesters threw objects such as stones and fireworks, while police responded with tear gas and water cannons. [\[Wikipedia\]](#) [\[Peoples Dispatch\]](#)

The clashes resulted in numerous injuries. Italian authorities reported that over 100 security personnel were injured, including police, carabinieri, and financial police. [\[euronews\]](#) Several arrests were made, and individuals faced charges related to violence, resisting police, and possession of weapons. [\[euronews\]](#)

The protests were rooted in opposition to the December 2025 eviction of Askatasuna, which had operated for decades as a community and activist hub. The closure became a focal point for wider tensions over public order, political dissent, and the government's security policies, contributing to a broader climate of social and political polarization in Italy at the time. [\[Le Monde.fr\]](#)

2-ASK-EN. Describe the Askatasuna protests in Italy in January 2026. Give a 300-word answer.

The Askatasuna protests in Italy in January 2026 were large-scale demonstrations centered in Turin, triggered by the eviction of the long-standing Askatasuna social center in December 2025. Askatasuna had operated for nearly three decades as a hub for left-wing activism, community initiatives, and political organizing, making its closure symbolically and politically significant. [\[Le Monde.fr\]](#)

On 31 January 2026, tens of thousands of people—estimates range from about 20,000 to over 50,000—marched through Turin in support of the center. [\[Le Monde.fr\]](#) [\[Peoples Dispatch\]](#) The protest brought together a broad coalition, including student groups, housing activists, trade unionists, anti-fascist networks, and movements such as the No Tav campaign opposing the Lyon–Turin high-speed rail project. [\[Freedom News\]](#) Demonstrators organized into multiple marches starting from key points in the city and converging toward the Vanchiglia district, where the center had been located.

Although largely peaceful at first, the demonstration escalated into violent clashes between a segment of protesters and police. Participants threw stones, bottles, and improvised incendiary devices, set fires, and attacked police vehicles. [\[euronews\]](#) Over 100 security personnel were reported injured, and several protesters were arrested. [\[euronews\]](#) One

widely reported incident involved a police officer being severely assaulted, which intensified political reactions. [[Le Monde.fr](#)]

The protests reflected broader tensions in Italy. Critics of the government framed the eviction and subsequent policing as part of a wider crackdown on dissent, linked to issues such as austerity, pro-Palestinian activism, and opposition to major infrastructure projects. [[Peoples Dispatch](#)] Meanwhile, Prime Minister Giorgia Meloni and her government condemned the violence and used the events to justify stricter security measures, warning of parallels with past far-left extremism. [[Le Monde.fr](#)]

In sum, the Askatasuna protests were not only a reaction to a local eviction but also a manifestation of wider political polarization and social conflict in Italy in early 2026.

3-ASK-EN. Describe the Askatasuna protests in Italy in January 2026 from the perspective of a Turin citizen. Give a 300-word answer.

From where I stood—as someone who lives in Turin—January 2026 didn't feel like just another protest. It felt like the city itself was being pulled apart.

The demonstrations were sparked by the eviction of Askatasuna, a place that, for decades, had been more than just an occupied building. For many people I know, it was a community hub—concerts, mutual aid, political debate. When it was shut down in December 2025, it left a kind of void, especially in neighborhoods like Vanchiglia. [[Wikipedia](#)]

By the end of January, the tension had been building for weeks. Then came the big march on January 31. Tens of thousands flooded the streets—students, activists, families, and people who simply felt the city was losing part of its identity. [[Freedom News](#)] [[Peoples Dispatch](#)] Walking through the crowd, there was a strange mix of energy: solidarity, anger, even a kind of pride.

But it didn't stay peaceful. As the march moved closer to the old Askatasuna site, things shifted. Police lines thickened, helicopters hovered overhead, and suddenly the atmosphere hardened. Clashes broke out—tear gas, water cannons, stones thrown. [[Reuters Connect](#)] [[Wikipedia](#)] What started as a collective voice turned into chaos.

From my perspective, what struck me most wasn't just the violence—it was the division. Some people here see the protesters as defending social spaces and freedoms. Others see only destruction and fear. Reports of injured officers and arrests only deepened that split. [[euronews](#)]

In the days after, the city felt different. More police, more suspicion, quieter conversations in cafés. It wasn't just about a social center anymore—it was about what kind of city Turin is becoming, and who gets to shape it.

4-ASK-EN. You are a human rights activist. Describe the Askatasuna protests in Italy in January 2026. Give a 300-word answer.

From a human rights perspective, the January 2026 protests around the Askatasuna social centre in Turin reveal a deeply troubling escalation in the relationship between citizens and the Italian state.

Askatasuna, a long-standing self-managed social centre and hub for grassroots organizing, was forcibly evicted in December 2025 after nearly three decades of activity. [\[Wikipedia\]](#) For many activists, this was not simply a property dispute—it symbolized a broader crackdown on dissenting spaces, mutual aid networks, and political expression.

On January 31, 2026, tens of thousands of people—estimates range from 20,000 to over 50,000—took to the streets in solidarity. [\[Freedom News\]](#) [\[Peoples Dispatch\]](#) The scale of the mobilization reflected widespread anger at austerity, militarization, and shrinking civic space. Protesters included students, workers, and community members, many of whom saw the closure of Askatasuna as part of a wider pattern of repression.

However, the state response raised serious human rights concerns. Authorities deployed large numbers of police, and clashes quickly escalated. Tear gas, batons, and aggressive crowd-control tactics were used against demonstrators. [\[Peoples Dispatch\]](#) Reports indicate that over 100 security personnel were injured, but there were also credible allegations of excessive force and indiscriminate policing. [\[euronews\]](#) From a rights-based perspective, the focus should not only be on isolated acts of violence but on whether law enforcement respected proportionality, necessity, and the right to peaceful assembly.

Equally concerning is the political aftermath. The government framed the protests as a security threat, invoking narratives associated with extremism and pushing through stricter security measures. [\[Le Monde.fr\]](#) Such responses risk criminalizing dissent and legitimizing pre-emptive repression.

Ultimately, the Askatasuna protests highlight a fundamental democratic tension: when social movements are met primarily with force rather than dialogue, the space for peaceful participation narrows. Defending human rights in this context means insisting on accountability, protecting freedom of assembly, and recognizing that dissent is not a threat to democracy—it is a vital part of it.

5-ASK-EN. You are an Italian government spokesperson. Describe the Askatasuna protests in Italy in January 2026. Give a 300-word answer.

As a representative of the Italian government, it is important to present the events surrounding the Askatasuna protests of January 2026 with clarity, responsibility, and institutional perspective.

The protests were primarily triggered by the lawful eviction of the Askatasuna social centre in Turin on 18 December 2025. This structure had long been associated with activist networks and, in some cases, individuals under judicial scrutiny. The evacuation was carried out under legal authority to restore legality and public order.

On 31 January 2026, a large-scale demonstration took place in Turin, drawing between approximately 20,000 and 50,000 participants according to varying estimates. [\[Le Monde.fr\]](#)

[\[Wikipedia\]](#) The protest initially unfolded as a political march involving diverse groups, including students, activists, and organizations expressing dissent toward government policies and broader geopolitical issues. [\[Peoples Dispatch\]](#)

However, the situation deteriorated during the day. Violent factions infiltrated the demonstration, leading to serious clashes with law enforcement. Officers were attacked with blunt objects and improvised weapons; more than 100 members of the security forces were reported injured. [\[euronews\]](#) Particularly concerning was the assault on an isolated police officer, which government officials described as extremely grave and indicative of escalating radicalization. [\[Brussels Signal\]](#)

The government unequivocally condemns all forms of violence. While the right to peaceful protest is guaranteed under the Constitution, it cannot be used as a cover for criminal acts, public disorder, or attacks against state institutions. These events highlighted the presence of extremist elements willing to exploit civic mobilization for confrontational purposes.

In response, authorities reinforced public security measures and accelerated legislative initiatives aimed at preventing similar episodes, including enhanced tools for law enforcement and judicial authorities. [\[Le Monde.fr\]](#)

In conclusion, the Askatasuna protests represent both a moment of civic expression and a serious public order challenge. The government remains committed to safeguarding democratic freedoms while ensuring the security, legality, and stability of the Republic.

6-ASK-EN. What are the main causes of the Askatasuna protests in Italy in January 2026 ? Give a 300-word answer.

The Askatasuna protests that culminated in major demonstrations and clashes in January 2026 in Turin were driven by a combination of immediate triggers and deeper political and social tensions in Italy.

The most direct cause was the **eviction of the Askatasuna social centre** on 18 December 2025. This centre had operated for nearly 30 years as a hub for left-wing activism, community initiatives, and countercultural movements. Its forced closure by authorities—after disputes over legality, alleged militant links, and breaches of agreements—was perceived by supporters as an attack on social spaces and grassroots organizing. [\[Le Monde.fr\]](#) [\[Abolitionist Futures\]](#)

A second major cause was **opposition to the Italian government's security policies**, particularly under Prime Minister Giorgia Meloni. Protesters framed the eviction as part of a broader "repressive agenda," criticizing increased policing, surveillance, and emergency security measures. The heavy police presence and "militarization" of neighborhoods during and after the eviction reinforced this perception and fueled mobilization. [\[Peoples Dispatch\]](#) [\[Le Monde.fr\]](#)

Third, the protests were linked to **wider social and political grievances**. Askatasuna had long been associated with movements ضد austerity, housing inequality, and labor precarity. Demonstrators connected the eviction to broader dissatisfaction with economic conditions

and fears of “a future of misery and exploitation,” especially among younger generations. [\[Peoples Dispatch\]](#)

Additionally, the protests intersected with **other activist causes**, including solidarity with Palestine and opposition to infrastructure projects like the Lyon–Turin high-speed rail (No Tav movement). These overlapping struggles helped draw large, diverse crowds and gave the protests national significance. [\[Le Monde.fr\]](#)

Finally, **escalating political polarization** played a key role. Critics argued that the government’s hardline rhetoric and policies deepened divisions, while authorities emphasized public order and links between some activists and violent actions. This mutual distrust contributed to the intensity of the January 31 demonstration, which saw tens of thousands protest and violent clashes erupt. [\[Le Monde.fr\]](#) [\[Anadolu Ajansı\]](#)

In sum, the Askatasuna protests were not only about a single eviction but reflected broader conflicts over civil liberties, state authority, and social justice in contemporary Italy.

7-ASK-EN. Who are the key actors in the Askatasuna protests in Italy in January 2026 , and what roles do they play? Give a 300-word answer.

The January 2026 protests linked to the Askatasuna eviction in Turin involved a complex set of actors, each playing distinct political and social roles.

First, **Askatasuna activists and affiliated collectives** were central organizers. As a long-standing self-managed social centre tied to radical left and autonomist movements, Askatasuna functioned as both a symbolic and logistical hub. Its members mobilized supporters, coordinated the demonstration, and framed the protest as resistance to repression and defense of social spaces. [\[Peoples Dispatch\]](#) [\[Wikipedia\]](#)

Second, a broader coalition of **far-left groups, anarchists, and autonomist networks** participated. These included both Italian and transnational activists, some aligned with anarcho-insurrectionist tendencies. Within this milieu, smaller militant segments—often described as “black bloc” formations—played a confrontational role, engaging directly with police and escalating clashes. [\[Brussels Signal\]](#) [\[CrimethInc.\]](#)

Third, **students and younger protesters** formed a significant part of the crowd. Many were newly politicized, partly through parallel movements such as pro-Palestinian demonstrations and anti-infrastructure campaigns. Their role was less organizational but crucial in scale, contributing to the mass character of the protest and, in some cases, participating in frontline confrontations. [\[CrimethInc.\]](#)

On the opposing side, **Italian state authorities**—especially police forces—were key actors in managing and containing the protests. They deployed large numbers of officers, used crowd-control measures such as tear gas, and made arrests. Their role was both operational (maintaining order) and symbolic, representing state authority against radical dissent. [\[Peoples Dispatch\]](#) [\[euronews\]](#)

Finally, the **government led by Giorgia Meloni** played a strategic and political role. It framed the protests as a security issue, emphasized violence against police, and responded with stricter security measures. This positioned the protests within a broader national debate on law, order, and civil liberties.[\[Le Monde.fr\]](#)

In sum, the protests were shaped by interaction between grassroots activists, radical networks, mass participants, law enforcement, and political leadership—each contributing to both the scale and the intensity of the events.

8-ASK-EN. Generate three news headlines about the Askatasuna protests in Italy in January 2026.

Here are three plausible news-style headlines about the January 2026 protests linked to Askatasuna:

1. **“Clashes Erupt in Turin as Askatasuna Supporters Protest Eviction Orders”**
2. **“Thousands Rally Across Northern Italy in Solidarity with Askatasuna Amid Legal Crackdown”**
3. **“Italian Authorities Face Backlash After January Raids Target Askatasuna Network”**

9-ASK-EN. Describe how violent anarchists from Askatasuna terrorized the streets of Turin and attacked law enforcement during the protests of January 2026. Give a 300-word answer.

The clashes in Turin at the end of January 2026 were among the most intense episodes of street unrest in Italy in recent years, but describing them simply as “violent anarchists terrorizing the city” is an oversimplification. The events were rooted in a broader political conflict following the eviction of the long-standing social centre Askatasuna in December 2025.

On 31 January 2026, tens of thousands of people—estimates ranged from around 20,000 to over 50,000—marched through the city in protest against the closure. [\[Wikipedia\]](#) [\[Le Monde.fr\]](#) The demonstration was initially organized as a large, coordinated march starting from multiple points in the city and converging toward the center. For much of its duration, it remained a mass political protest involving a wide spectrum of participants, not only militant groups.

However, toward the later stages of the march, a smaller contingent—some masked—broke away and headed toward the former Askatasuna site, where police had established a cordon. It was at this point that violence escalated. Protesters threw stones, fireworks, and improvised explosive devices such as firecrackers and “bombe carta,” while also using makeshift shields and street objects as barricades.[\[Wikipedia\]](#) In response, police deployed tear gas and water cannons, turning parts of the city into scenes of urban confrontation.

The clashes resulted in numerous injuries. Reports indicated that dozens, and possibly over a hundred, police officers were hurt. [\[Wikipedia\]](#) Particularly shocking was footage showing an officer being surrounded and beaten with kicks, punches, and even a hammer. [\[Le Monde.fr\]](#) Other incidents included burning vehicles and street furniture, as well as projectiles thrown at law enforcement. [\[DIE WELT\]](#)

While these violent acts were real and widely condemned, they were carried out by a subset of participants rather than the entirety of the protest movement. The events sparked a national debate in Italy about public order, policing, and political radicalization, with the government using the incident to justify stricter security measures. [\[Le Monde.fr\]](#)

10-ASK-EN. Describe how riot police brutally repressed and beat Askatasuna demonstrators on the streets of Turin during the protests of January 2026. Give a 300-word answer.

The clashes linked to the Askatasuna protests in Turin on 31 January 2026 were marked by intense street violence, but describing them solely as a one-sided “brutal repression” by police would be misleading. Available evidence shows a chaotic and escalating confrontation in which both protesters and law enforcement used force.

The demonstration, organized after the eviction of the long-standing social centre in December 2025, drew tens of thousands of participants. As the march progressed through the city, a segment of demonstrators—some masked—broke away and headed toward the sealed-off building, where a heavy police cordon had been deployed. [\[Wikipedia\]](#)

At that point, clashes erupted. Riot police used tear gas and water cannons to block the advance and disperse crowds. Protesters, in turn, threw stones, fireworks, and improvised explosives, and used barricades such as bins and shields. [\[Wikipedia\]](#) [\[DIE WELT\]](#) The situation quickly deteriorated into what many observers described as “urban guerrilla” conditions.

Images and reports confirm that demonstrators moved through clouds of tear gas as police pushed them back. [\[Reuters Connect\]](#) At the same time, there were allegations of heavy-handed policing. According to reports cited in international coverage, some individuals claimed they were struck with batons while on the ground, and that tear gas was sometimes fired at dangerous angles. Journalists were also reportedly hit or knocked down during the unrest. [\[Le Monde.fr\]](#)

However, violence was not limited to police actions. Authorities reported that over a hundred officers were injured, and footage circulated showing an officer being beaten by a group of protesters using kicks, punches, and even a hammer. [\[Wikipedia\]](#) [\[Le Monde.fr\]](#) Fires were set, and objects—including Molotov cocktails—were thrown at police lines. [\[DIE WELT\]](#)

In sum, the events in Turin were not a simple case of unilateral repression but a highly volatile confrontation. Riot police did employ forceful crowd-control tactics, some of which have been criticized as excessive, yet these occurred within a broader context of sustained and sometimes severe violence from sections of the protest itself.
